

VENEZUELAN MISSION IS CENTER OF NUMBER OF BRILLIANT SOCIAL FUNCTIONS

Continued from page five.

Interested to notice the name of Mr. and Mrs. Sinclair Lewis in the list of guests at the dinner which the British Ambassador and Lady Bessie gave last week. Sinclair Lewis, who has come here to reside in the author, you know, of that very much read and much discussed book, "Main Street." That dinner party was unusually interesting, the guests including a number of artists and people of letters like Mrs. Henry Wilder Keyes, Claire Sheridan, the prominent English sculptress, Mr. and Mrs. Gilbert Bruns, and Mr. de Launay.

Mrs. Sheridan, whose portrait busts of Lenin and Trotsky have attracted so much attention, was in Washington for a short visit and returned to New York last Thursday, but is coming back here this month some time for about six weeks if she can find a suitable house for herself and her small son, Richard Brinsley Sheridan, who is with her in this country. She is planning to do a number of portraits while she is here.

I told you a week or so ago that Gen. Badoglio, former chief of the general staff and now a life member of the supreme council of the Italian army, was coming over here in May. He is coming with the Italian Ambassador, Rolando Ricci, who is going to Rome in May to confer with the premier. At least a little bird told me so. Gen. Badoglio's trip will be made as the representative of the Italian army to the congress of the Italian army to be held in Rome. He is to be accompanied by his chief of staff, Col. Silianni, who distinguished himself during the war and who wrote the famous "victory bulletin" announcing the annihilation of the Austrian army. Of course, every such prominent visitor means a round of entertainments. There is also some rumor that Crown Prince Humbert will come to Washington next week. I hope so. Gen. Armando Diaz, commander in chief of the Italian armies, is planning to come, then and Prince Humbert may accompany him.

SEN. PAYOT WILL VISIT UNIVERSITY OF VIRGINIA.

GEN. CHARLES PAYOT, who was director general of supplies and communications during the war with Germany, is coming over next fall also. He is coming chiefly to visit the Virginia military institute. Did you know that Dr. L. W. Glazebrook? I think it was his grandfather, founded that splendid institution? Dr. Glazebrook's son, Larkin, Jr., has been laid up for some weeks because of an operation on his knee and while he is laid up he is more or less idle. He has made some of the loveliest parchment lamp shades I've seen in many a day. He has a great deal of artistic taste and has turned out some lovely ones. His friends are just clamoring to buy them. He makes them to order too for some of his friends; they select the designs and colors and he turns out beautiful works of art. Parchment visiting cards seem to be the latest fad; cards engraved on parchment instead of pasteboard, don't you know.

A Chinese mission headed by Dr. Wang, chief justice of the supreme court of China, is due here soon. It is in Canada now, believed in an effort to secure Canada's influence against the renewal of the Anglo-Japanese treaty and is coming on here to persuade Harding to repudiate the Lansing-Light note exchanged in 1917. The mission, believe, is en route to the league of nations conference at Geneva. Washington is never without distinguished visitors. And distinguished visitors always make things lively here.

The League of American Pen Women's magazine, the Penwoman, for April, is just out and is an unusually interesting number. Notice that Mrs. Carl Vrooman, wife of the former Assistant Secretary of Agriculture and the daughter of Mrs. Matthew T. Scott, has written something for it, as has also Mrs. Elizabeth Andrews. Mrs. Vrooman is a Franco-American Alliance, which is an interestingly written plea for the Americans to help the war widows and orphans of France. Mrs. Andrews' article is "A Thought on Art." A son, William Edgar Baughman, Jr., was born to Lieut. Comdr. W. E. Baughman, U. S. N., and Mrs. Baughman, at Mare Island, Cal. April 12, 1921.

"Hat" is a cute story by Florence Partello Stuart. One might find her suggestion very useful, too!

SCIENTISTS EAGER TO VISIT REALM OF PRINCE ALBERT.

TO GO BACK a bit to the Prince of Monaco, I was interested to read the other day an article by George G. MacCurdy, of Yale University, about the prince. Shall I read it to you? All right.

"The visit of his serene highness, Prince Albert I of Monaco, who is in Washington to receive the Agassiz

satisfying, spurred the princely patron of science on to new endeavor in the prehistoric field. We next find him at work on a plan to found in Paris an institute of human paleontology and visiting in person the caves being explored under his auspices in Spain. The first staff of the institute included two of the ablest prehistorians in Europe: the Abbe H. Breuil and Dr. H. Obermaier. Before the beginning of the world war the beginning of the world war associated with a powerful Frenchman, and a handsome building in Paris had been nearly completed.

INSTITUTE BEGINS RESEARCH WORK AGAIN.

With the war over, the Institute of Human Paleontology is functioning. The director is the French Professor Marcelin Boule, who is likewise editor of that excellent periodical, L'Anthropologie. The institute was formally opened by Prince Albert on December 23, 1920, in the presence of the president of the French republic, Prince Roland Bonaparte, the minister of public instruction, members of the diplomatic corps, and representatives of various scientific institutions and societies.

Real beads seal and example reproduce its own kind. The foundation established by the Prince of Monaco and his many benefactions in the field of prehistoric archeology have resulted indirectly in the organization of other agencies that have the one common goal. Two of these should be mentioned in this connection. The first is the Spanish Commission for Paleontological and Prehistoric Investigations founded in 1912 through the initiative of the Marquis of Cerralbo. The second is the American Foundation in France for prehistoric studies, the first year's work of which will begin on July 1, 1921, under the directorship of the students under proper direction, an opportunity to excavate at the paleolithic site of La Quina (Charente), to visit the best known prehistoric stations and museum collections, and to take advantage of the various facilities for prehistoric study in Paris, not the least of which will be the Prince of Monaco's Institute of Human Paleontology.

Two Kinds of Women

WE KNOW a woman, who when she needs to purchase necessary things for the home or the family puts on her shopping costume, dabs a bit of powder on her nose and sallies forth.

She shops here and there and down another hunting and h-u-n-t-i-n-g. When she gets home she is j z y and j-a-d-e-d. She feels all mused up mentally and physically.

WE KNOW another who has learned the art of reading the advertisements before she starts out. She finds out what she wants and where to get it. Then she goes straight down town and right to the store that has IT.

In this way she saves time, money and effort and comes home fresh as a daisy and ready to get friend husband a good dinner instead of taking him to the cafeteria.

Which one are you?
